

Antenna Specifications

Product ID	SYNAVU001AA
Product Name	Passive UWB Vivaldi Antenna
Frequency Range	2 GHz – 14 GHz
Dimensions	100.5 mm × 70 mm
Polarization	Linear
Radiation Pattern Type	Directional

1 Overview

The Passive UWB Vivaldi Antenna covers 2 GHz to 14 GHz, giving you a full 12 GHz of uninterrupted bandwidth wherever you need it. Whether you're working on radar, microwave imaging, 5G research, spectrum monitoring, or EMC testing, this antenna keeps up with your demands. It runs completely passive — no external power, no complications, just solid, directional performance with linear polarization ready for both lab setups and real-world deployments.
